OHIO CD09

Methodology:

This poll was conducted via text and live caller. The survey was completed by Noble Predictive Insights from July 22-24, 2024, from a sample of Ohio voters obtained from the voter file. The sample size was 435 likely general election voters, obtained via screening questions. The sample was weighted by age, gender, ethnicity, county, education, and recalled 2020 vote. Numbers may not equal 100% due to rounding. The margin of error was +/- 4.7% Non-response, coverage error, and other factors may also contribute to error.
